

The department of radiation oncology at the university Hospital in Liège Belgium has vacant position for a  
***senior radiation oncologist as regular staff member (100%)***

#### Department and hospital

- The department of radiation oncology at the University of Liège is the largest department of radiation oncology in southern Belgium. It is the only university department in the Walloon region linked to a complete school of medicine.
- The department is spread over the university hospital and 2 remote sites : the recently opened Urban Radiotherapy Centre in Liège (CURE), and the outpost for proximity radiotherapy in the province of Luxembourg (Libramont).

#### Infrastructure (from 2021 onwards) :

- A university department with 5 vaults, for 2 newly installed linacs, and for our stereotactic radiotherapy system (Cyberknife with Robocouch). A dedicated new CT simulator is available. This department opens in a new oncological center and is integrated in a full platform of oncological imaging (nuclear medicine with PET-CT, dedicated MRI, ...).
- A new urban radiotherapy site with 2 linacs in 3 vaults and a dedicated new CT simulator.
- A radiotherapy site in Libramont, with plans to move to the new Vivalia hospital after 2028, with a new RT department

#### Radiotherapy equipment and team

- All 5 linacs are equipped with full IMRT/IGRT capabilities. A surface tracking system, a table with 6 degrees of rotational and translational position corrections, and automated identification of patients and immobilization material are added early 2021.
- An active brachytherapy program is running, with both permanent seed implants and a HDR treatment room.
- A department wide Record and Verify system, workflow management system, videoconference system and a documentation system is available, linking all sites and staff members together.
- Treatment plans are prepared with state of the art systems : Raystation, Brachyvision and Precision.
- 13 senior radiation oncologists, 2-5 residents, 6 medical physicists, a quality manager, are part of our >80 staff team

#### Offer

We are looking for a certified radiation oncologist, willing to build with us one of the largest and most modern radiation facilities in Belgium. The focus is high quality clinical radiotherapy. The site of work would be the hospital in Libramont. Active participation in multidisciplinary teams in the province of Luxembourg is required. The candidate should speak French or be willing to master this language. This job offer is valid until 30-06-2021.
